Actionable Items:

What we should continue doing:

- Communicating changes we have made
- Communicating issues that require attention
- Architectural-minded design
- Learning from each other
- Being awesome
- Thinking more like a group
- Meeting and programming as a group rather than on our own
- Commenting on SVN commits

What we should start doing:

- Regularly updating sprint hours
- Starting tasks earlier in the sprint
- Not leave most work until the last minute

What we should stop doing:

- Implementing changes that create bugs
- Committing changes that break the program
- Mis-estimating hours
- Trying to add semi-major changes when time is running short
- Adding state variables to each possible action.
